

CLEARLYRATED FEATURES!

New for you!

After the exciting launch of the ClearlyRated.com website earlier this year, there are even more new features coming your way!

Chat Bot

Capture Leads & Drive Traffic to Your Website

Capture hiring manager and job seeker leads by driving them to your existing job listings and contact us forms. The ClearlyRated bot displays on your profile page and quickly identifies if the visitor is a hiring manager or looking for a job. Our bot then gives them the appropriate link to your website and tracks whether they click on the link. Easy peasy!

Available now to Plus and higher subscribers.

Star Rating Widget

Display Your Star Rating on Your Company's Website

Amplify your service story on your website, exactly where your buyers are going to learn more about you. Place this widget on your website and proudly display your ClearlyRated star ratings in real-time, just like they do on your profile page.

Beta testing available in October to Premium and higher subscribers.

Bullhorn Integration

There are two phases of this integration roll out plan.

Phase 1: View Survey Responses

View all survey responses connected to an individual in Bullhorn. These responses will display under a ClearlyRated tab in Bullhorn.

Available now to all premium and higher subscribers.

Phase 2: Automate ClearlyRated Surveys

Save time preparing lists. Automate the sending of ClearlyRated contacts directly out of Bullhorn, allowing for more flexibility to survey more often.

Beta testing starts in November for premium or higher subscribers.
